

ICD-10 | Intraoperative and Postoperative Complications and Disorders of Implants

1. Spine:

- a. Pseudarthrosis after fusions
- b. Post laminectomy Syndrome
- c. Post laminectomy Kyphosis
- d. Postsurgical Lordosis

2. General Intraoperative

- a. Fracture of bone following orthopedic implant, prosthesis, bone plate
- b. Intraoperative Hemorrhage or Hematoma
- c. Accidental puncture or laceration of musculoskeletal structures

3. General Postoperative

- a. Post procedural hemorrhage and hematoma
- b. Fracture of prosthesis
- c. Dislocation of prosthesis
- d. Instability of prosthesis
- e. Mechanical Loosening of prosthesis
- f. Periprosthetic Fracture
- g. Periprosthetic Osteolysis
- h. Wear of plastic bearing surface
- i. Mechanical Complication of ORIF
 - i. Breakdown of internal fixation device
 - ii. Displacement of internal fixation device
 - iii. Other mechanical complication of internal fixation device
- j. Infection or inflammatory reaction to:
 - i. Prosthesis
 - ii. Internal fixation device
- k. Embolism and thrombosis
- l. Fibrosis
- m. Pain
- n. Stenosis
